- 1978
 - 08 Registered as a company for Hyundai Construction
 - 06 Converted to Sebang Tec Co., Ltd.
- 1972
 - 01 Founded SEBANG Industrial Company

Organization

Business Areas

Mechanical Equipment Construction

We have carried out plumbing and duct work in various buildings in the specialized equipment fields, including air conditioning, heating and cooling, water supply and wastewater.

Firefighting Equipment Construction

We have a variety of construction achievements in the field of fire extinguishing equipment, including fire piping, Halon, CO2, sprinklers, and fire hydrants.

Steel Structure Construction

We have been carrying out steel structure business in various mechanical equipment construction such as module rack manufacturing, utility tools, and machine rooms.

Technological Innovation

Modular Construction Method

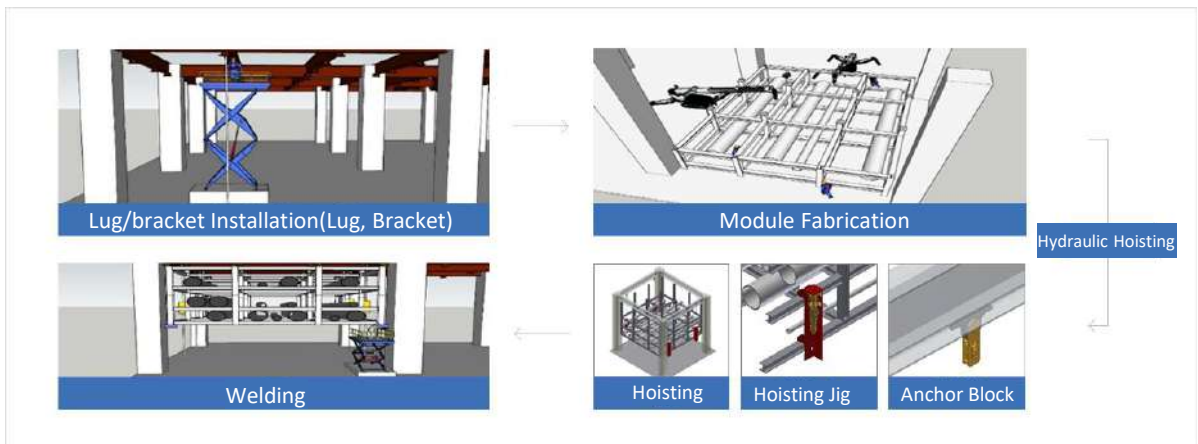

Recent trends in high-tech facility construction are rapidly moving towards large-scale and heavy-load operations. The modular construction method involves the step-by-step process of fabricating facility modules externally, then transporting, assembling, and installing them.

Compared to traditional methods, modular construction offers advantages such as standardization and precise execution, with expected benefits including accident prevention, quality improvement, and reduced construction time. Our company has successfully performed mega-module construction at Samsung Electronics' Pyeongtaek P-Project. Furthermore, we have recently expanded our Dangjin factory on a large scale and secured specialized equipment and manpower to prepare for modularization.

Scaffold-free Construction

The scaffold-free construction method involves pre-constructing lugs and brackets in the space where the module will be ultimately installed, then lifting and welding the modules manufactured in stages. By implementing the scaffold-free method, scaffolding-related costs and construction periods can be reduced, and safety accident risks and management costs can be expected to be reduced. Precise execution is crucial in all stages of measurement, fabrication, and installation, making it a method that only companies with accumulated experience and expertise can carry out.

Sebang TEC guarantees the industry's highest level of technology and construction quality through continuous innovation and creative research and development.

CERTIFICATE OF PATENT

CERTIFICATE OF PATENT

Patent Number No. 10-1722574
Application Number No. 10-2015-0089310
Filing Date June 23, 2015
Registration Date March 28, 2017

Title of the Invention
Installation equipment of fully welded ball valve and construction
method of fully welded ball valve by using these

Patentee
Recorded in the Registration Content

Inventor
Recorded in the Registration Content

This is to certify that, in accordance with the Patent Act, a patent for the
invention has been registered at the Korean Intellectual Property Office.

Preventing industrial disaster
Korea Occupational Safety and
Health Agency

Certificate No. No. 1017

SAFETY AND HEALTH MANAGEMENT SYSTEM

CERTIFICATE

Certification No. KOSHA-MS

Name of Certified Office : Sebang TEC Co.,Ltd.

- Classification : Professional construction company

Address : 128, Beopwon-ro, Songpa-gu, Seoul

Valid period : November 29, 2023 ~ November 28, 2026

Korea Occupational Safety and Health Agency hereby certifies that the
Safety and Health Management System of above office fits the
certification standard of the KOSHA-MS.

November 29, 2023

Director of the Korea Occupational Safety and Health Agency /seal/

Even if it is maintained by receiving the certificate according to regulation of above standard, since it does not exempt the
legal obligation which is demanded by the related law such as "Occupational Safety and Health Act", it must apply and
practice demands for related such as "Occupational Safety and Health Act" in order to prevent industrial disaster due to
danger - risk in the job site at the company.
